- Sub Dividable

Property Description

There are very few places on the planet where you can live sustainably next to a National Park and an acclaimed 5-star resort. The video (see below) and photos show the property in sections that could be for friends/family or sold as parts of this hydro powered organic property featuring two homes, an automated enclosed greenhouse, and other structures with a total land area of 65 acres (26 hectares): the main house complex; the casita; and 3 areas with pastures and prepared building sites. The entire property was mindfully designed to be long-lasting and low maintenance while keeping you connected via high-speed internet. Covered walkways link all structures which were completed in 2012. Lying at a fresh altitude of 1,200 meters, panoramic views abound up to the National Park, down to San Isidro's lights, and across the entire valley Del General. The very private main house "complex" sits on 40 acres (16 hectares) with garage, views of the tranquil stream running behind the house.
