Property Description

Casa Belmer is a one-of-a-kind masterpiece. There are many beautiful luxury homes in Costa Rica, but Casa Belmer exceeds all expectations. Only minutes away from the beach, Belmer offers precise perfection in every detail for luxury tropical living with a unique panoramic treetop ocean view of the entire Pacific coastline. Casa Belmer is a product by FRENCH Group, drawn by Martin Wells and Manuel Montaresi Architects, and built by top builder Leif Berhardt. FRENCH make it their trademark to deliver the best views in the most inviting setting made up of the highest quality materials and finishing touches. It is very rare to have a smart home with this attention to design, lush tropical jungle, and panoramic ocean views this close to the beach! This house is both a perfect getaway home and a great venue to host family and friends. It is a great place to enjoy morning coffees on private terraces while listening to birds, lounge by the pool to the sound of crashing waves, and have friends over for a sunset dinner.
