Property Description

This one of a kind, open floor plan 2 bedroom home focuses primarily on outdoor living and being close to the wonderful wildlife Costa Rica has to offer. Built on a lot of just under 700m2, this 2 bedroom 2 and a half bathroom home is split over 2 levels. There is ample parking off the public road for 2 cars. As you walk down the stairs, you are greeted by nature immediately with local flowers and plants on your way to the main entrance. The oversized steel front door instantly gives you an idea of what to expect in this modern, minimalistic design combining nature and Costa Rican hardwood finishes.Walking into the home, you are immediately drawn to look out past the open living area directly into the canopy where there is often a local troupe of howler monkeys just out of reach. On the left hand side of the open floor plan is the kitchen area and storage/office room. This area is separated from the main living area by floor to ceiling glass windows and doors and can be opened to fully take advantage of the open plan.
